1.5 Million CP Rechargeable Spotlight

Safety Instructions

- Keep out of reach of children
- Do not use in wet conditions
- Store in a clean, dry environment
- Do not use if it is damaged in any way
- Never short the battery terminals
- Never attempt to change the bulb when the unit is charging
- Do not expose the battery to fire or high temperatures
- Never look directly into the light
- Caution! The lens will become hot after prolonged use
- Do not disassemble battery or remove the battery terminals
- Before disposing, protect the battery terminals

Battery Disposal

- The lead acid battery in this spotlight has many years of service if it is regularly used and charged. When the battery does expire it should be removed from the spotlight for re-cycling.
- Contact your local solid waste authority for recycling information.

Charging the Internal Battery

1. The internal battery should already be charged at time of purchase. However, you should give it a top-up charge as soon as possible.

2. The battery should only be charged with one of the accessories provided.

3. The On/Off trigger must be in the OFF position before charging.

4. Avoid charging in temperatures below 4°C or above 40°C

5. The spotlight should be kept fully charged when not in use. When being stored it should be charged every 6-8 weeks.

6. Always ensure that the trigger is in the OFF position when it is stored.

7. If the battery is fully depleted then it takes 8-12 hours to fully charge it with the mains adapter

8. The battery can also be charged from the 12 volt cigarette lighter in your vehicle but do not charge for more than 3 hours. Charge with the engine running to prevent running down of your vehicle battery.

9. The red LED will show when the spotlight is being charged but does not indicate when the battery is fully charged.

10. Do not charge continuously for more than 12 hours.

11. Do not have the light switched on when charging.

Using your Spotlight

- To operate the spotlight press the trigger switch, release to turn off.
- To keep it on continuously press the trigger and slide the button above the trigger. To turn off slide the button in the opposite direction.
- Under optimum conditions the spotlight can be used for 25-30 minutes.
- The battery will give better service the more the spotlight is used and if the spotlight is always stored fully charged.

Specification	
Bulb	H3 6 Volt 55W
Battery	6 Volt 4Ah
Battery Type	Sealed Lead Acid

Accessories
Charger: Input 240V AC / Output 12V 500mA
